

1. POLICY

FMP's Sustainable Acquisition Program (SAP) requires that all purchases of items that fall under a sustainable product/service category be purchased in accordance with the regulations identified. The only acceptable justifications for procuring these items without the minimum requirements are as follows:

- (a) The item is only available at an unreasonable price (exceeds 110% of the price of alternative items)
- (b) The item is not available competitively within a reasonable time
- (c) The item does not meet reasonable performance specifications

2. SUSTAINABLE PRODUCT/SERVICE CATEGORIES

Information and guidance about the following categories is available on the Green Procurement Compilation Tool at <https://sftool.gov/greenprocurement>

- A. Recycled Content Products**
 - Designated by the Environmental Protection Agency (EPA)
- B. BioPreferred and Biobased Products**
 - Designated by the United States Department of Agriculture (USDA)
- C. Energy and Water Efficient Products and Services** Designated by:
 - ENERGY STAR
 - Federal Energy Management Program (FEMP)
 - Electronic Product Environmental Assessment Tool (EPEAT)
 - Low Standby Power
 - WATERSENSE (water efficient products and services)
- D. Significant New Alternative Policy (SNAP) Chemicals** or other alternatives to **ozone-depleting substances** and high global warming potential hydrofluorocarbons
- E. Safer Choice Labeled Products** (chemically intensive products that contain safer ingredients)
- F. SmartWay Products** (fuel efficient products and services)
- G. High Performance Sustainable Building Guiding Principles (HPSB GPs)**

3. REPORTS

Supplier shall provide FMP with reports detailing the purchase of the current EPA and USDA designated items for each fiscal year (or portion of the fiscal year) where a contract is active (i.e., work is performed). The fiscal year starts October 1st and ends September 30th.

Annual Reports: Supplier shall provide FMP with annual reports detailing purchases of EPA and USDA designated items as specified below within ten (10) business days after the end of FMP's fiscal year (September 30).

Annual reports shall contain purchase information on each EPA and USDA designated item as required by FMP to include, but not be limited to, the following:

- (a) Total dollar amount for all purchases of each EPA and USDA designated item.
- (b) Dollar amount of purchases of each EPA and USDA designated item containing minimum recovered or biobased material content.
- (c) Dollar amount of purchases of each EPA and USDA designated item not containing minimum recovered or biobased material content.
- (d) Indication of the applicable justification if the EPA or USDA designated item does not contain minimum recovered or biobased material content.
- (e) Supplement sheet detailing amount of recycled / biobased content for each EPA and USDA designated item, regardless of whether they meet the minimum recovered or biobased material content.

Purchase Order Closeout Report: Supplier shall provide FMP with a purchase order closeout report detailing all FMP purchases of EPA designated items only, from the end of the last annual report provided to FMP up to the purchase order end date. The purchase order closeout report shall be submitted within thirty (30) days after the purchase order end date. Purchase order closeout reports shall include the same information as specified above for annual reports.

Please use attached SAP Reporting Summaries for all required reporting:

- A. Sustainable Acquisition Program EPA Recycled Designated Items Report and Recovered Material Content Certification
- B. Sustainable Acquisition Program USDA Biobased Designated Items Report and Biobased Material Content Certification

If no items designated on the EPA and USDA lists were purchased as part of the purchase order, the Supplier can complete the Certification of No SAP Purchases Report (Attachment C) in lieu of the separate EPA and USDA reports referenced above.

4. RECOVERED MATERIAL CONTENT

All EPA designated items supplied by Supplier pursuant to performance of this purchase order shall meet the then current minimum recovered material content as specified by the EPA. Supplier should refer to EPA's list of EPA-designated items (available through the Internet at <https://www.epa.gov/smm/product-resource-guides-comprehensive-procurement-guideline-cpg-program>). Supplier agrees to adhere to such additional minimum recovered material content requirements, as practicable, in the performance of this purchase order. Supplier shall provide FMP with reasonable notification in the event that Supplier cannot supply product(s) with the specified minimum recovered material content. The following is an example list of products that may be used in this purchase order for construction for which recovered/recycled products are available. The list is not all inclusive. It is desirable that Suppliers be able to supply the greatest number of recovered/recycled products listed meeting the health and environmental specifications:

- Building insulation
- Carpet
- Cement and concrete
- Floor tiles
- Roofing materials
- Flowable fill
- Nonpressure pipe
- Patio blocks
- Consolidated/Reprocessed latex paint

5. BIOBASED MATERIAL CONTENT

All USDA designated items supplied by Supplier pursuant to performance of this purchase order shall meet the then current minimum biobased material content as specified by the USDA. Supplier should refer to USDA's list of USDA-designated items (available through the Internet at <http://www.biopreferred.gov>). Supplier agrees to adhere to such additional minimum biobased material content requirements, as practicable, in the performance of this purchase order. Supplier shall provide FMP with reasonable notification in the event that Supplier cannot supply product(s) with the specified minimum biobased material content. The following is an example list of products that may be used in this purchase order for construction for which biobased products are available. The list is not all inclusive. It is desirable that vendors be able to supply the greatest number of biobased products listed meeting the health and environmental specifications:

- Graffiti and grease removers
- Insulating foam

- Concrete and asphalt release fluids
- Fluid-filled transformers
- Wood and concrete sealers
- Composite panels
- Adhesive and mastic removers
- Carpets
- Roof coatings
- Hydraulic fluid
- Water tank coatings

6. REFERENCE DOCUMENTS

Federal Acquisition Regulations: This SAP specification incorporates by reference certain Federal Acquisition Regulations (FAR) identified below. Articles incorporated by reference shall apply with the same force and effect as if set forth herein in full text. The said articles are modified by changing the word "Contracting Officer" to "FMP" or "Buyer" as appropriate, changing the term "Contractor" to "Supplier," and changing the word "Contract" to "Purchase Order," "Order," or "Subcontract."

FAR 52.211-5 Material Requirements
FAR 52.223-1 Biobased Product Certification
FAR 52.223-2 Affirmative Procurement of Biobased Products Under Service and Construction Contracts
FAR 52.223-4 Recovered Material Certification
FAR 52.223-9 Estimate of Percentage of Recovered Material Content for EPA-Designated Items
(*Invoked for purchases exceeding \$150,000*)
FAR 52.223-11 Ozone-Depleting Substances and High Global Warming Potential Hydrofluorocarbons
FAR 52.223-15 Energy Efficiency in Energy Consuming Products
FAR 52.223-17 Affirmative Procurement of EPA-Designated Items in Service and Construction Contracts

Other Reference Documents

Resource Conservation and Recovery Act of 1976 (RCRA) (42 U.S.C. 6901, et seq.)

TOTAL DOLLAR AMOUNT PURCHASED ON THIS REPORT			\$	\$				\$
Total Dollar Amount of EPA Designated Items Supplied to FMP						(A)		\$
Total Dollar Amount of EPA Designated Items Supplied to FMP With Recovered Content						(B)		\$
Estimate of Percentage of Recovered Material Content For EPA Designated Items						B Divided By A		%

If Contractor is submitting a Closeout report, the Contractor must submit an estimate of the percentage of recovered material content of all EPA Designated Products supplied during the term of the contract. Use the following definitions in calculating the estimate:

"Postconsumer Material" means a material or finished product that has served its intended use and has been discarded for disposal or recovery, having completed its life as a consumer item. Postconsumer material is a part of the broader category of "recovered material."

"Recovered Material" means waste materials and by-products recovered or diverted from solid waste, but the term does not include those materials and by-products generated from, and commonly reused within, an original manufacturing process.

†=For Subcontracts Exceeding \$150,000, reporting must contain ESTIMATE OF PERCENTAGE OF RECOVERED MATERIAL CONTENT FOR EPA DESIGNATED ITEMS.

* = May overlap with biobased content requirements. Recycled content requirements have precedence.

Recovered Materials Certification	
I _____ (name of certifier), am an officer or employee responsible for the performance of this contract and hereby certify that the percentage of recovered material content for EPA-designated items met the applicable contract specifications or other contractual requirements.
